# Looking for a Greener Approach to Printing?

One Thing You Can Do...

## Recycling Toner Containers

Print cartridges that manufacturers want returned come with a pre-paid label that you can use to return them at no cost to you. All other plastic toner cartridges and bottles can be shipped at the customer's expense to the manufacturer for recycling.

In either case, assure that the items are sealed in a heavy duty plastic bag then place as many cartridges that will safely fit into a sturdy shipping box. The manufacturer assumes the responsibility and cost for their recycling.

Our vendors accept toner containers for recycling at the following addresses:

### Canon Toner Container Collection Center

2051 Meridian Place  
Herborn, KY 41048

### Ricoh Recycling (Savin)

2051 Meridian Place  
Herborn, KY 41048

### Konica Minolta Recycling Center

420 International Blvd. Ste. 1100  
Brooks, KY 40109

### Kyocera Mita Recycling Center

C/O Round 2, Inc.  
445 S. Royal Lane, Suite 500  
Coppell, TX 75019

## Why Recycle?

- More than 3 quarts of oil are used to produce each laser cartridge.
- The plastic used in each printer cartridge takes more than 10 centuries (that's 1000 years!) to decompose.
- 25 million printer cartridges go to landfills each month.
- Toner cartridge remanufacturing saves over 38,000 tons of plastic and metal from landfills.
- Stacking 125 laser toner cartridges end-to-end equals the height of the Statue of Liberty.
